State Management & Data

Redux Toolkit, Context API, React Query, Vuex, RxJS, REST APIs, GraphQL, Axios/Fetch, Firebase

Animation & UX

GSAP, CSS animations, Lottie Animations

Tools

Git, Github, Bit Bucket, Jira, Confluence, Trello, Adobe XD, Figma, VS Code, Postman, Vite

AI

ChatGPT, Claude, Antigravity, Cursor, Copilot, Augment

Others

Strong interpersonal, written & spoken communication, Problem solving, Team player.

Experience

Nextbridge: Senior UI Engineer (*April 2022 - Present*)

Codexia Technologies: Front-End Web Developer (*August 2020 - April 2022*)

Byteio Digital Solutions Wordpress Developer (*April 2019 - January 2020*)

Major Projects

Name	ERP-based freight system
Role	Senior Frontend Developer
Tools & Technologies	Figma, Visual Studio, HTML5, CSS3, React.js, React Bootstrap, Axios, Redux, Material UI, third-party packages, Bit Bucket
Description	<p>An ERP-based system that enables freight forwarding companies to manage shipments, customs processes, duty calculations, and compliance in one integrated interface, improving operational efficiency and decision-making. My role involves developing dynamic and interactive user interfaces using React, ensuring a smooth and responsive user experience.</p> <p>Some Features: Login/signup, User management, Intrastate, Freight management, Logistics, Client management, Companies management, Finance, Client management, Shipper management, Broker management, Ports Management, Emails, Products management, Upload/download files</p>

Name	Learning Management System (LMS)
Role	Senior Frontend Developer
Tools & Technologies	Adobe XD, Figma, VS Code, HTML5, CSS3, Bootstrap, Angular, Typescript, Angular Bootstrap, GitHub
Description	<p>A Learning Management System (LMS) designed to manage and deliver educational content with features like course creation, progress tracking, quizzes, and assessments. It supports role-based user access, file uploads, and social authentication, allowing instructors to organize courses and students to learn and track their progress through an intuitive interface.</p> <p>Some Features: Role based User access, File Uploads, quizzes, assessments, social authentication</p>

Name	Crowd Sourcing Marketplace
Role	Senior Frontend Developer
Tools & Technologies	HTML, SCSS, Bootstrap, Vue.js, Vuetify, JavaScript, Lottie, Handsontable, Adobe XD, Figma, BrowserStack, GitHub, Jira, VS code
Description	<p>The project is a crowd-sourcing platform that procures items from e-commerce retailers.</p> <ul style="list-style-type: none">● See Supply Requirements● Supply Commitment

	<ul style="list-style-type: none"> ● Ship committed quantities ● Get Paid as per supply requirements ● Search and Filters ● Tracking and delivery details

Name	Sports Web Application
Role	Senior Frontend Developer
Tools & Technologies	Adobe XD, Visual Studio, HTML5, CSS3, Bootstrap, Angular, Firebase, TypeScript
Description	<p>A web application in which the user can sign up/log in to keep track of a specific list of sports and their events. It contains detailed information about the sports and their leagues and players, and their matches that are going to happen or are being played by the teams in different leagues. The complete data about the players or sports is integrated and displayed on the UI using the APIs and Firebase.</p> <p>Some Features: User authentication (login & signup), User Management, Sports Management</p>

Name	House Allotment System
Role	Senior Frontend Developer
Tools & Technologies	Adobe XD, Visual Studio, HTML5, CSS3, Bootstrap, Angular, TypeScript, GitHub, Material UI
Description	<p>A dashboard for administrators to view real-time statistics, pending housing requests, current allotments, and property availability status.</p> <ul style="list-style-type: none"> ● User Management ● House Allotment Workflow ● Property Management ● Notifications & Alerts

Name	Law Firm
Role	Senior Frontend Developer
Tools & Technologies	Adobe XD, Visual Studio, HTML5, CSS3, Bootstrap, Angular, Firebase, TypeScript, Github
Description	<p>A is a comprehensive web platform built to streamline the operations of law firms. It allows multiple law firms to register and manage their legal practices in one centralized system. Once registered, firms can manage their internal operations, legal suits, team assignments, and documents securely and efficiently.</p> <ul style="list-style-type: none"> ● Law Firm Registration & Onboarding ● Team Collaboration ● File Management

Name	U Guard
Role	Senior Frontend Developer
Tools & Technologies	Angular, Firebase, TypeScript, Visual Studio, HTML5, CSS3, Bootstrap, Adobe XD
Description	<p>A web application that allows the admin to manage users, update their profiles, and change their passwords. It includes features to block, unblock, edit, or delete users.</p> <p>Some Features: Login/Signup, User management, profile editing, user access control, file uploads, and lazy loading</p>

Name	Business Web Application
Role	Senior Frontend Developer
Tools & Technologies	Adobe XD, Visual Studio, HTML5, CSS3, Bootstrap, WordPress, XAMPP
Description	<p>A web application of a company that has detailed information about it. it is a static application that contains detailed information about the services that the company is offering to its customers. Users can contact the company by filling out a contact form using their email.</p>

Name	HumanJot
Client	https://humanjot.com
Role	UI Engineer
Tools & Technologies	Adobe XD, Visual Studio, HTML5, CSS3, Bootstrap, JavaScript
Description	<p>It is an AI-powered platform that transforms generated text into natural, human-like content. It helps users create clear, engaging, and well-structured writing for marketing, emails, landing pages, and business</p>

	communication. The platform improves content quality by removing robotic tone and enhancing readability, flow, and personalization. It is designed for marketers, content creators, and businesses to produce high-quality content faster and more efficiently using AI-driven tools.
--	---

Name	Yene
Client	https://www.iyene.com
Role	UI Engineer
Tools & Technologies	Figma, Wordpress, HTML5, CSS3, Bootstrap, JavaScript
Description	<p>The platform is designed to present the company's capabilities in financial technology, enterprise applications, and digital infrastructure solutions. It highlights services for banks, microfinance institutions, and businesses requiring scalable digital payment and management systems.</p> <p>Some Feature:</p> <ul style="list-style-type: none"> ● Showcasing IT services ● Attracting business clients ● Presenting portfolio / capabilities ● Lead generation (contact forms / inquiries) ● Explaining technical services (development, design, etc.) ● Contact forms ● Business inquiry system

Name	Time Stamp
Client	https://timestamp-app.web.app
Role	Frontend Developer
Tools & Technologies	Adobe XD, Visual Studio, HTML5, CSS3, Bootstrap, Angular, Firebase, TypeScript, Github
Description	<p>A real-time time-tracking and event logging web application built using Firebase. The system enables users to create, manage, and monitor timestamped records with instant updates powered by Firebase's real-time database. The primary objective of this project is to provide a simple and efficient way to track activities with accurate timestamps, ensuring seamless updates without page reloads while leveraging Firebase's real-time synchronization capabilities.</p> <p>Some Feature:</p> <ul style="list-style-type: none"> ● Create and store timestamp-based entries ● View list of recorded timestamps ● Edit and manage entries

Name	Action-cards
Client	https://action-cards.com
Role	UI Engineer

Tools & Technologies	Figma, Wordpress, HTML5, CSS3, Bootstrap, JavaScript
Description	Built a structured safety instruction system that enhances emergency preparedness by translating complex first-aid procedures into simple, visual, step-by-step action cards. The system helps users respond confidently and accurately during high-pressure real-world situations where quick decision-making is critical.
